Brand New Book ***** Print on Demand *****.The Bureau of Justice Statistics (BJS) designed the Arrest-Related Deaths (ARD) program to be a census of all deaths that occur during the process of arrest in the United States. The manner in which these data were collected varied from state to state, and often depended on the data systems available to the state reporting coordinators (SRCs) responsible for data collection throughout the state, the involvement of local law enforcement agencies or medical examiner s/coroner s offices, and other support that the SRC may have had to conduct the data collection. This variability in approach has led to questions about whether these data collection methods were capable of capturing the universe of arrest-related deaths and law enforcement homicides in particular. BJS requested RTI International to conduct an assessment of the ARD program to evaluate (1) the coverage of the program in comparison to Supplementary Homicide Reports (SHRs) maintained by the Federal Bureau of Investigation (FBI) and (2) various aspects of the current program .
