Taylor Francis Ltd, United Kingdom, 2015. Paperback. Book Condition: New. New.. 234 x 156 mm. Language: English . Brand New Book. Criminal Recidivism intends to fill a gap in the criminological psychology literature by examining the processes underlying persistent criminal careers. This book aims to investigate criminal recidivism, and why, how and for how long an individual continues to commit crimes, whilst also reviewing knowledge about risk assessment and the role of psychopathy (including neurocriminological factors) in encouraging recidivism. It also focuses on the recidivism of sex offenders and on what works in reducing reoffending. At an empirical level, this book attempts to explain criminal persistence and recidivism using longitudinal data from the Cambridge Study in Delinquent Development (CSDD). At a psycho-criminological level it joins together quantitative and qualitative analyses, making its content a practical guide to explain, predict, and intervene to reduce the risk of criminal recidivism. The authors present quantitative analyses of criminal careers, as well as qualitative life histories of chronic offenders, in order to bring home the reality and consequences of a life of crime. The book is aimed not only at advanced students and academics in psychology, criminology, probation studies, social sciences, psychiatry, sociology, political science, and penology, but also at decision makers, policy officials, and practitioners within the realm of crime intervention and prevention, and also at forensic experts, judges and lawyers.
