SOME PHASES OF COST ACCOUNTING IN THE CHEMICAL INDUSTRY (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Some Phases of Cost Accounting in the Chemical Industry The cost of manufacturing the separable steps in a process can be ascertained usually, but the cost of manufacturing by-products cannot be determined accurately. Therefore it is accounted for on an arbitrary basis. The value at which by-products are brought into the cost accounts varies in accordance with the effect which the management may desire on the cost figures of the principal product, which in turn may affect the costs of several other products. By-products are accounted for as produced. Furthermore, the unit of measure and the degree of chemical strength varies between the different products. The units of measure may be either gallons, pounds, hundred pounds, net tons, or gross tons, and products may be quoted on one basis on the market and their costs recorded on another basis. These facts of course do not vary the elements of cost, but they do make the unit cost figures of variable meaning. In the case of major products manufactured in different strengths this condition is remedied, however, by the use of chemical factors. Cost Sheet The following is a form of cost sheet for monthly reports of manufacturing cost in bulk, which can be adapted to a columnar cost ledger, so as to show comparative monthly costs on the ledger.
