Liquididea Press. Paperback. Book Condition: New. Paperback. 262 pages. Dimensions: 8.9in. x 6.0in. x 0.9in. Leon Tsarev is a high school student set on getting into a great college program, until his uncle, a member of the Russian mob, coerces him into developing a new computer virus for the mobs botnet - the slave army of computers they used to commit digital crimes. The evolutionary virus Leon creates, based on biological principles, is successful -- too successful. All the worlds computers are infected. Everything from cars to payment systems and, of course, computers and smart phones stop functioning, and with them go essential functions including emergency services, transportation, and the food supply. Billions may die. But evolution never stops. The virus continues to evolve, developing intelligence, communication, and finally an entire civilization. Some may be friendly to humans, but others are not. Leon and his companions must race against time and the military to find a way to either befriend or eliminate the virus race and restore the worlds computer infrastructure. Praise for the Singularity Series: Highly entertaining, gripping, thought inspiring. Dont start without the time to finish it wont let you go. Its a problem for them, but not for the emergent machines. Brad Feld, managing director Foundry Group, cofounder TechStars A fascinating look at how simple and benign advancements in technology could lead to the surprise arrival of the...
