Melville: Chief Engineer of the Navy On the land rails of steel traversing valley, plain, and mountain make easy the path of the flying express and the fast freight, which together conquer time and distance in the binding into a homogeneous whole of the many States which form a Republic almost continental in extent; but the railroad is fixed, a permanent way, whose direction varies only with new constructions. The sea, on the contrary, gives a track-fluid, mobile, universal - which turns wherever swift prows may point, and on which massive hulls, much too huge for any form of land transit, may pass with ease from port to port. Moreover, when in 1805 - nine years after Washington wrote of America's distant situation - Nelson chased half around the world a French fleet nearly twice the force of his own, scared by the very terror of his name, his fierce ardor fretted itself to fury with his ships, which through a run of 7,000 miles of sea averaged...
