Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Notes on Galvanism and Faradism The present volume in no way aims at competing with the many exhaustive works dealing with the theoretical aspect of Medical Electricity. It is intended simply as an introduction to a very difficult subject, and is mainly for the use of masseuses preparing for the examinations in Medical Electricity now held by the Incorporated Society of Trained Masseuses. For this reason the more complicated forms of apparatus, e.g. diathermy, high frequency, etc., have been omitted. The certificated masseuse is bound by the rules of the above Society to work only under the direct supervision of a registered medical practitioner. It has not therefore been thought necessary to enter to any extent into the pathological and symptomatic aspects of the diseases mentioned; still less to point out the evil results attendant upon erroneous methods of treatment; for it is assumed that the patients are adequately protected by the fact that the doctor prescribes the form of treatment desirable, modifying the same when time and progress make modification necessary. I have endeavoured to avoid, as far as possible, explanations requiring an extensive knowledge of mathematics, physics, and chemistry, and to make use of ordinary rather than technical terms.
